RE: Case No. 2003-00128
Milford Area Water Line Extensions and Water Storage Tank
DW #: 0810046-02-001

Ms. Talley:

This letter is in response to a letter from the Director of the Public Service Commission, Michael F. Burford. The letter was addressed to Mr. William Clary, who is the President of the Buffalo Trail Water Association, and was dated January 13, 2005. It stated that the Public Service Commission had not received "as-built" drawings or a certified statement that the construction has been satisfactorily completed in accordance with the contract plans and specifications. It also requested a status on the said construction.

Construction was completed and the project was completely closed out in July of 2003. Enclosed is a copy of the certification letter that was written on July 22, 2003. Also, enclosed are the "as-built" record drawings for the project. It appears everyone involved except the Public Service Commission received this letter. We were not aware at the time that the Public Service Commission required a certification letter or a set of "as-built" record drawings, and we are sorry for any inconvenience that this may have caused.

If you need any additional information please feel free to give me a call.

Sincerely,

David Ray Coe

RE: Milford Area Water Line Extensions and Water Storage Tank
DW #: 0810046-02-001

Mr. Clary:

The project has reached completion and was completed in accordance with the plans and specifications. We recommend that the Buffalo Trail Water Association accept the project as complete.

The water lines have been in service for sometime. January 1, 2004 will be the official warranty date for the water lines. The tank has been in service for several weeks. March 15, 2004 will be the official warranty date for the water tank. These dates effectively begin the 1-year warranty for each contractor.

Enclosed are the official record drawings. These will be useful for future reference.

Enclosed is a project summary addressed to Elwood Howe at Rural Development. It shows that \$9820.03 in funds remain. We recommend that the remaining funds be used by the water association to purchase PVC pipe which will be used for water lines. The water association desires to use the remaining funds for this.
